

COMMERCIAL APP PERMISSION REQUEST

# Versed helps people memorize Scripture through calm guided practice.

Versed is an iOS-first Scripture memory app built for saving verses and passages, organizing them into custom collections, and practicing them through progressive memorization exercises.

### Product

Mobile Scripture memorization app. iOS first, with future platform expansion possible after launch.

### Monetization

Free core practice experience with a planned Pro subscription for deeper practice tools and licensed translation options.

### Scripture Use

Text appears in browse, saved verses, custom collections, practice stages, review, and completion flows.

### Positioning

Versed is designed for memorization and review. It is not positioned as a full Bible reader replacement.

### Practice Experience

Tap reveal, word bank, fill blank, first-letter recall, type out, spoken review, custom collections, review stages, and progress rewards.

### Translations

**Currently available through provider access:** NLT, KJV, NKJV, NASB, CSB.

**Priority licensing targets:** NIV, ESV, NirV, Reina-Valera 1960, NRSVue.

### Controls Versed Can Support

- Attribution wording and placement
- Export and sharing restrictions
- Translation-specific enablement and disablement
- Display, caching, and offline access limits
- Subscription or entitlement gating
